## **DETAILED ACTION**

Page 2

## Claim Rejections - 35 USC § 112

Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear as to whether or not the retaining plate defined in claim 9 is intended to define the same retaining plate recited in claim 1, or a different retaining plate.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8, 12, 20 and 29 are rejected under 35 U.S.C. 102(b) as being anticipated by Ferrante. In regard to claims 1 and 29, Ferrante discloses a fluid containing "cleaning" device comprised of a housing 3 defining a fluid reservoir and an opening, a "cleaning medium" 13 carried by the housing (as this element can be used to scrape a surface, it is considered a "cleaning medium"), a valve 5 carried by the housing for providing communication between the reservoir and the cleaning medium, a closure structure 1, 4 closing the opening, a flexible and resilient actuator 4 adjacent the reservoir and deflectable between a rest position and an actuating position, a retaining plate 15 mounted in the opening (via the closure structure) and a bias structure 8

Art Unit: 3751

In regard to claim 2, the bias structure is formed of resilient material and the actuator includes a dome portion wherein the bias structure abuts the actuator at the dome portion. In regard to claim 3, the bias structure includes a spring 8 between the actuator and the retaining plate. In regard to claim 4, the closure structure includes a collar 16 protruding therefrom for receiving the bias structure. In regard to claim 5, the closure structure includes a cap 1 which threadedly couples the actuator to the housing. In regard to claim 6, the bias structure is a coil spring (see Figure 8). In regard to claim 7, the spring is metallic (as evidence by the cross-hatching). In regard to claim 8, the housing defines a base on which the cleaning medium is carried (via element 1) and has an aperture therein with the valve being movable relative to the aperture. In regard to claim 12, the bias structure is mounted between a collar 16 and a channel in the retaining plate. In regard to claim 20, a skirt portion of the closure provides a fluid tight seal between the closure structure and the housing.

## Allowable Subject Matter

Claims 27 and 28 are allowed.

Claim 9 would be allowable if rewritten to overcome the rejection under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to David J. Walczak whose telephone number is 571-272-

4895. The examiner can normally be reached on Mon-Thurs, 6:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Huson Gregory can be reached on 571-272-4887. The fax phone number

for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
